About Yo Wireless

Yo Wireless is a Global solution provider for Internet Service Providers (WISP's), Resellers and Operators. We offer scalable solutions for managing and billing public and private data networks via Gatekeeper.

The wireless innovator

We manage your network, so you know who is online and for how long!

WiFi Internet Access for Wireless Internet Service Providers, Resellers and Operators

a unique wireless solution

Use Yo Wireless for:

- Retail
- Shopping Centres/Malls
- Hospitality
- Conference Congress & Exhibition Centers
- Mobile and Fixed Line Operators
- Service Providers
- Cable Providers
- Internet Service Providers
- Rural Community Access

What does Yo Wireless offer?

We offer cloud based and easy to use access to the Internet, allowing you to commercialise your WiFi and or cabled networks without any security risks, complicated systems or major expense. More importantly, the solution complies with all known global data and IT tracking regulations.

Billing & Settlement

Yo Wireless processes online credit card transactions and manages roaming agreements with providers such as iPass and Boingo.
We provide settlement services enabling us to deliver access derived revenue at the earliest opportunity.

Free Internet Access

We offer various solutions for free internet to guests via profiles with e-mail addresses, Facebook, Twitter and mobile numbers.

Real Time Statistics

Yo Wireless links all payments, products and access with real-time overviews, e.g.:

- Online payment detail
- Voucher activation detail
- Roaming session detail
- Data relating to user statistics
- Session details such as usage, etc. estate-wide & by user
- Full graphical data dashboard

At any time you can choose to view your status represented graphically and in tables, filtered and sorted by location, product, status and billing channel, or download all data in an Excel format.

Landing pages fully customised (private label service)

Via the Yo Wireless online management portal, you WiFi owners can easily add/edit locations, define the look-and-feel and the content presented to your customers at specific locations, groups of locations or entire networks. Purpose built loyalty programmes are used to capture users undivided attention and presenting the access products and payment options that best suits your business. Landing pages are available in: English, French, Spanish, Italian, Russian, Dutch, German and Greek.

On-site Management of your locations

Yo Wireless's platform is a cloud computing hosted solution that allows all venue gateways to be managed. This allows rapid deployment of multiple locations and services, including remote maintenance and software updates across your whole estate.

Multi-Vendor

Yo Wireless is currently compatible with leading hardware vendors' routers and wireless access points. This allows customers to have a choice of vendors taking advantage of the best possible and most commercially viable supply of WiFi network product and technology.

Network Monitoring

Yo Wireless enables the monitoring of all locations with available data being accessed via our intuitive tools giving you a "complete view" of your network environment remotely.

Authorization, Authentication and Accounting:

Critical user login, authentication, authorization and session usage accounting functionality via various technical solutions, including: EAPSIM, soft SIM, Facebook, Registration Questionnaire & SMS.

Secure Payment Options:

Gatekeeper allows for multiple payment options including credit/debit cards, vouchers, front of house software packages and EPOS systems; ensuring the widest possible user base is able to conveniently pay for wireless services at any Yo Wireless enabled location.

Clearing, Billing and Settlement:

Gatekeeper calculates the revenue generated at the end of each month and distributes credit or debit notes to the venue operator, payment partners, and roaming partners as appropriate.

Global Roaming:

Offering the possibility for end-users to roam seamlessly between different networks is a key feature of the Yo Wireless platform.

Private Labeled:

Via a fully private labeled product offering, managed by Gatekeeper, we can brand and customise the users wireless experience at each unique location.

Multi Lingual:

Yo Wireless's solution is truly a Global Offering: our Gatekeeper platform supports multiple languages and currencies.

Management Portal:

You have full control and visibility of the service via the Gatekeeper Management Portal and graphical dashboard.

Technology Platform:

By using ground breaking designs, solutions and technology, Yo Wireless provides future proof system that delivers a complete back-office wireless solution and a fabulous user experience.
